

Olaoye Israel Aduragbemi

Full-Stack AI Engineer · LLM Systems · Agentic Applications

Lagos, Nigeria olaoyeaisrael@gmail.com (+234) 7032240391 [LinkedIn](#) [GitHub](#)

Full-stack engineer with hands-on production experience building AI-powered applications — including LangGraph agents, RAG pipelines, and voice-interactive chatbots. Comfortable across the stack (React Native, FastAPI, Node.js) and experienced deploying intelligent systems that solve real user problems. Looking to apply these skills to help train and evaluate frontier AI models at Mercor.

AI & LLM EXPERIENCE

Full-Stack AI Developer — NMobile Jan 2026 – Mar 2026
Fintech mobile app + intelligent customer agent

- Built a **conversational support agent** using **FastAPI + LangGraph**, enabling users to complete utility transactions (airtime, bills) through natural language — turning a chatbot into a functional "Action Agent."
- Integrated real third-party utility provider APIs into the agent's tool-calling loop, validating responses and handling failure states gracefully.
- Designed event-driven session management and secure wallet flows with React Native (Expo) + Redux Toolkit; deployed backend on a containerised stack.

LangGraph FastAPI Agentic AI Tool Calling React Native Redux Toolkit

Backend Developer — Lextorah AI Learning Platform Mar 2025 – Jun 2025
AI-powered education backend with RAG and transcription

- Built a **Socratic dialogue endpoint** using FastAPI that guides learners with follow-up questions rather than direct answers — a deliberate LLM prompting strategy.
- Implemented a **Retrieval-Augmented Generation (RAG)** pipeline: teachers upload PPTX, PDF, video, or audio; content is transcribed via **OpenAI Whisper**, chunked, embedded, and used to ground model responses.
- Secured all endpoints with JWT auth/authorization; designed role-based access for teachers vs. students.

RAG LLM Prompting Whisper (ASR) FastAPI Embeddings JWT

Frontend Developer — Taylor Communications Nov 2025 – Dec 2025
EdTech platform with AI + voice interaction

- Integrated an **AI chatbot with voice-based interaction** for student learning — combining speech recognition, LLM responses, and TTS in a single interface.
- Implemented role-based dashboards (students, tutors, admins) secured with JWT; built with React, Tailwind CSS, and Framer Motion.

Voice AI AI Chatbot React Redux

OTHER ENGINEERING EXPERIENCE

Mobile App Developer — TripEase

Jun 2025 – Sep 2025

- Built a cross-platform React Native transportation app with Google Maps API integration (routing, Places Autocomplete, live tracking via Zustand).
- Delivered a smooth UX for trip scheduling and multi-modal transport selection on both iOS and Android.

React Native

Google Maps API

Zustand

Frontend Developer — Abike's Alchemy

Sep 2025 – Nov 2025

- Developed a responsive e-commerce site (React + Tailwind CSS) with cart state management via Redux and smooth UI transitions using Framer Motion.

Trainee Engineer — Schneider Electric

Apr 2024 – Sep 2024

- Supported power system optimisation using EcoStruxure and EcoDial; worked on data-centre electrical infrastructure installation and contributed to SCADA data collection.

PROJECTS

Patient Monitoring Mobile App

- React Native app for real-time IoT pressure/temperature monitoring of smart hospital beds; push notifications alert caregivers to critical changes, aiding pressure ulcer prevention.

Teekville — Student Platform

- Full-stack web app (React + Express.js) with CGPA calculator, meeting scheduling, and test-taking; secured with bcrypt password hashing and JWT authentication.

Apple Clone — Interactive 3D Website

- Rendered interactive 3D product models using Three.js (JSON format) with GSAP animations; fully responsive via Tailwind CSS.

TECHNICAL SKILLS

AI/ML: LangGraph, FastAPI, RAG, Whisper, LLM prompting, agentic workflows, vector embeddings

Languages: Python, JavaScript/TypeScript, C#

Frontend/Mobile: React, React Native (Expo), Next.js, Redux, Zustand, Tailwind CSS, Framer Motion

Backend: Node.js, Express.js, FastAPI, REST APIs

Cloud/DevOps: AWS, Docker, Kafka, Linux

Databases: SQL, NoSQL (MongoDB)

EDUCATION

B.Sc Systems Engineering — University of Lagos

2018 – 2025
